by 1Password

The best way to experience 1Password in your browser. Easily sign in to sites, generate passwords, and store secure information, including logins, credit cards, notes, and more.

Note: it is both OK and recommended to allow it the same permissions in Private Windows.

---

## Step 5: Log into 1Password

If your toolbar icon looks like this, skip to the next step:

If your toolbar icon looks like this:

please click it and unlock 1Password with your password or biometric auth.

---

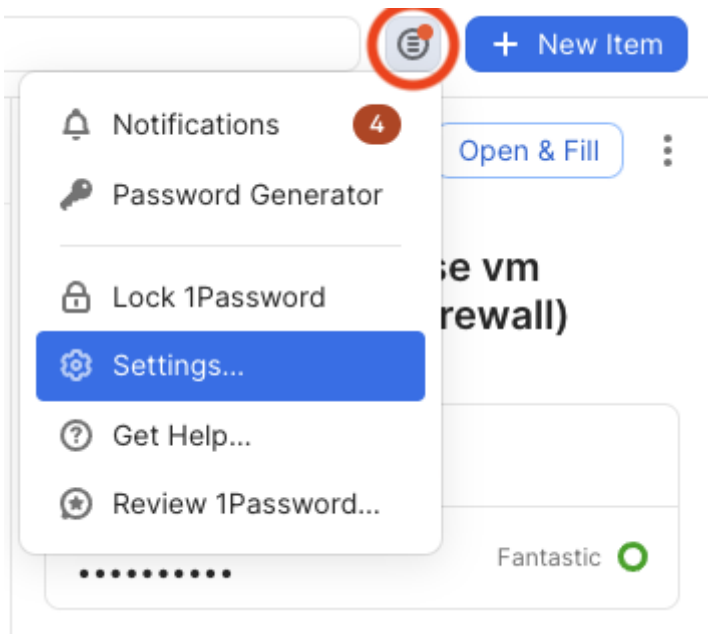

## Step 6: Install Complete - but we're not done!

1Password should now work for autofilling login information.

---

## Step 7: Configure

In the Firefox browser, click on the 1Password icon next to the address bar and then click on the "menu" icon (circled in red below), then `Settings...` as shown:

There are two tabs you will need to change settings in:

- **Autofill & save**
- **Accounts & vaults**

## Autofill & save

Click on the **Autofill & save** tab, and then disable "**Offer to save and sign in with passkeys**" because we currently do not use passkeys.

Make sure the vault selected next to "**New items get saved in:**" is set to **your named vault** e.g. . It should not be set to "Employee" or "Private" or anything else.

About

## Autofill & save

Offer to fill and save passwords

Show autofill suggestions when a form field is in focus

Offer to save items in autofill suggestions

Offer to save and sign in with passkeys

Allow caching passkey IDs in local storage

Improve the autofill experience with smarter suggestions while safeguarding your private key data. This may reveal your ownership of passkeys in 1Password.

Stop competing "sign-in with" pop-ups in the browser

Sign in automatically after autofill

1Password will automatically submit forms after filling logins.

New items get saved in:

[ Your Name ]

Offer to save logins

1Password will offer to save your pre-existing logins automatically.

Offer to save credit cards

1Password will offer to save your pre-existing credit cards automatically.

Offer to save contact information

1Password will offer to save your contact information automatically.

Offer to save "sign-in with" logins

## Accounts & vaults

Click on the Accounts & Vaults tab on the left. Uncheck Employee:

General

Security

Autofill & save

Accounts & vaults

## Accounts & vaults

Autofill and search from specific accounts or vaults while using this browser:

Account/Company Name  
yourname@example.com

Employee

As of May 1, 2024 the name of the "Private" vault has been changed to "Employee" for 1Password business accounts. This change was not made by us but [by the developers](#) of 1Password. Please continue to leave the Employee vault empty.

---

## Step 8: Proceed to Section 5

You're done!... at least with this part. Please proceed to **Section 5** to install 1Password on your phone or other mobile device. Note that **Section 4** is optional. If you have any questions, contact IT for help.
