

Safari

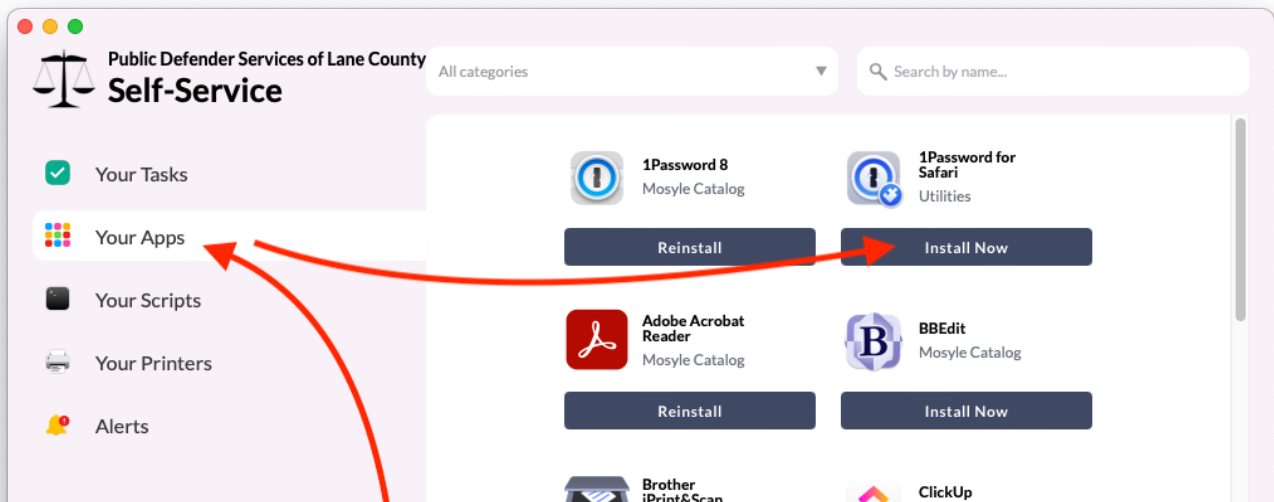

Step 1: Open the Self-Service app

Find the **Self-Service** app on your Dock and click to run the app. If the app is not located on your Dock, you can find it in the Applications folder using Finder. You can also quickly launch the app from Spotlight by using Command + Spacebar (⌘ +).

Once the Self-Service app is running, click the **Your Apps** tab. **1Password for Safari** should appear at the top. If it's not there, scroll until you find it or search by name.

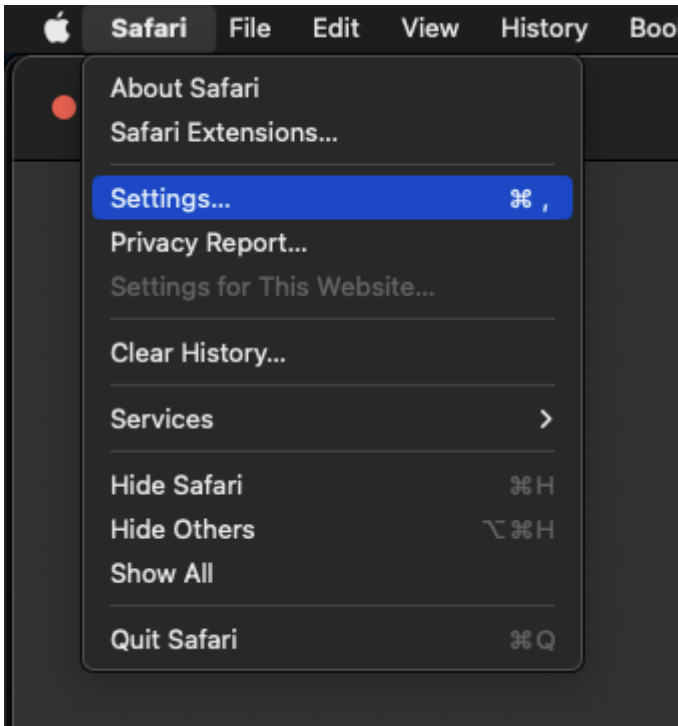

Step 2: Install Now

Click the **Install Now** button under the app heading called **1Password for Safari** and wait for the process to complete.

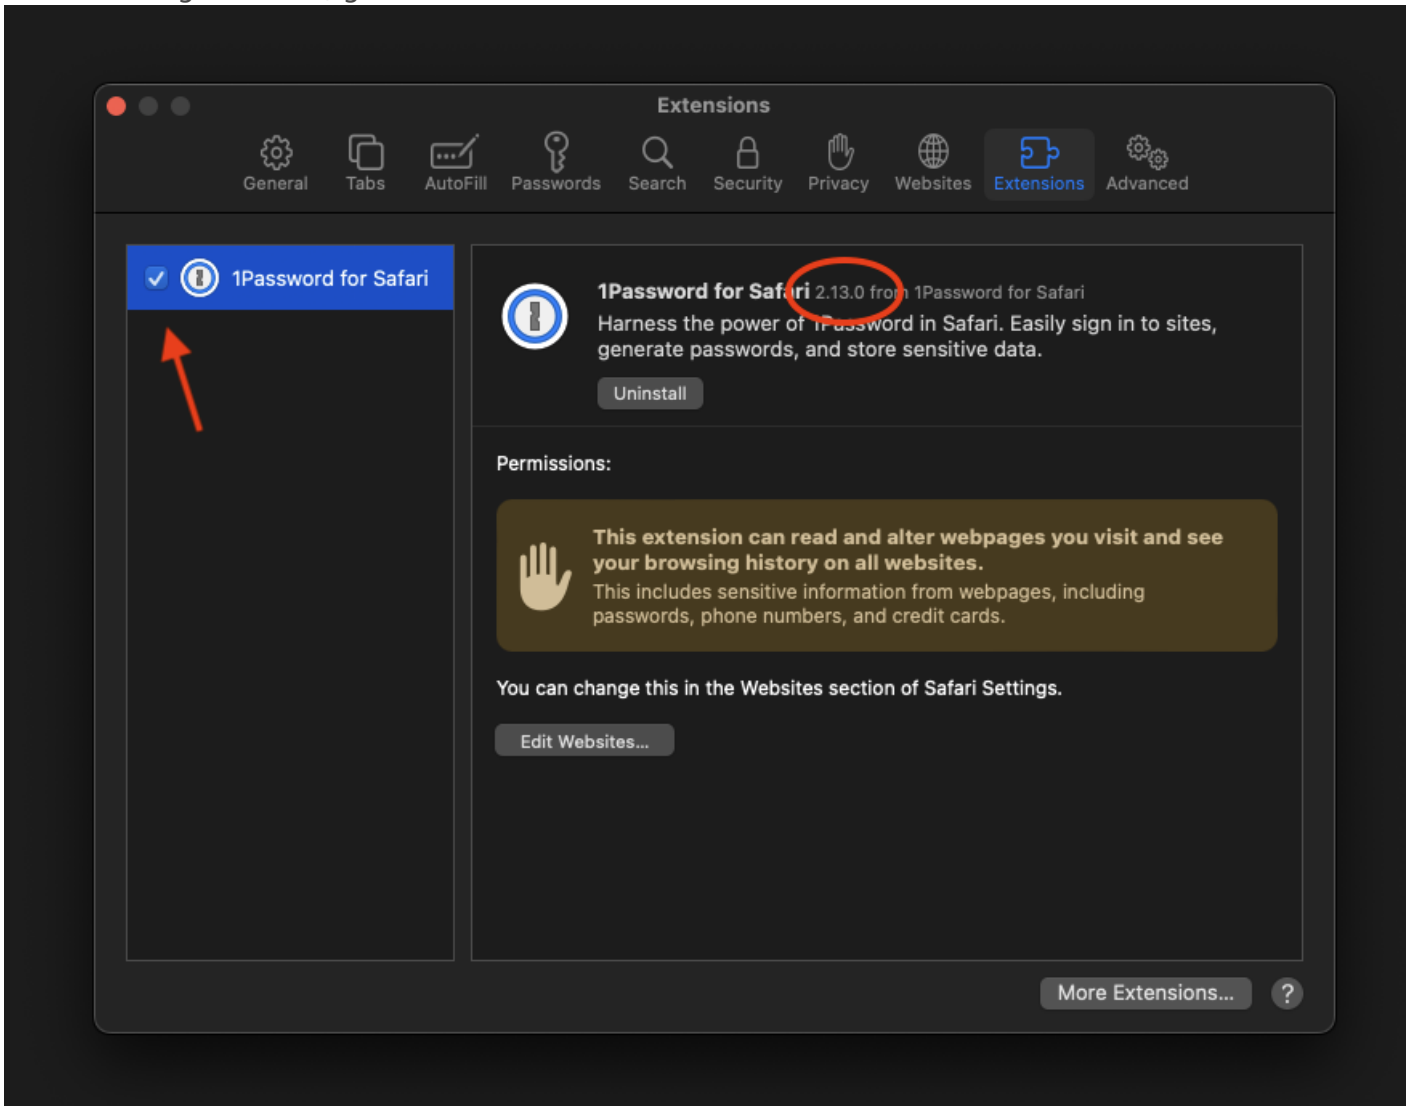

Step 3: Verify the extension is installed and enabled

Head up to the Safari menu → Settings...

In the Settings window, go to the Extensions tab.

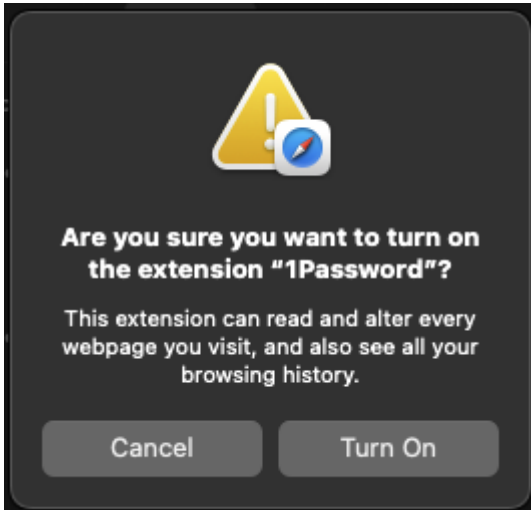

Verify that the 1Password extension has been installed:

- Make sure the check box next to "1Password for Safari" is checked. ☐

If the checkbox is unchecked, when checked for the first time you may be asked :

"Are you sure..."

Hit Turn On to activate the extension.

- Also, make sure the version number is `2.12.0` or higher.
- Finally, look at the top of an open Safari window. You should see the 1Password browser button now next to your search bar.

If the extension does not show up in the extensions list or the button does not show up either, try restarting Safari. If it still does not show up, contact IT for help.

Step 4: Log into 1Password

Click the 1Password browser button icon.

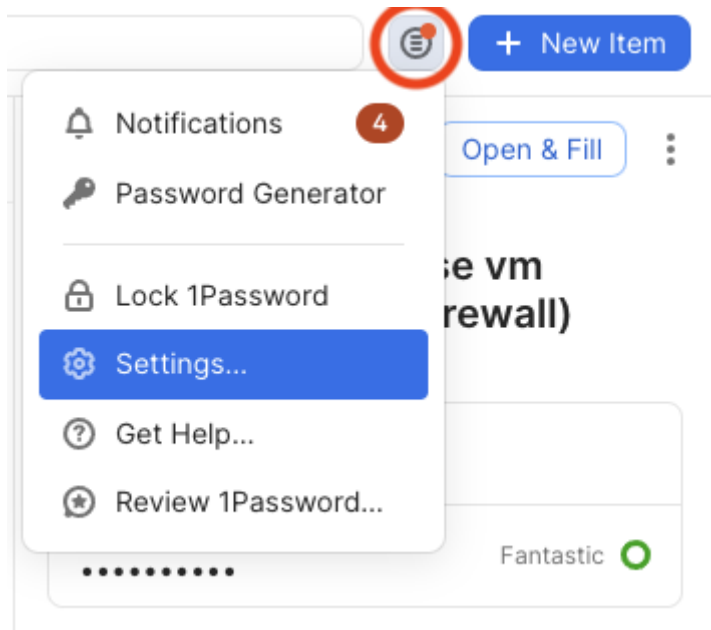

- If your toolbar icon looks like this:  skip to **Step 6**.
- If your toolbar icon looks like this:

please click it and use your password (or TouchID!) to unlock - autofilling will not work until you unlock 1Password.

Step 5: Configure

In the Safari browser, click on the 1Password icon next to the address bar and then click on the "menu" icon (circled in red below), then `Settings...` as shown:

There are two tabs you will need to change settings in:

- **Autofill & save**
- **Accounts & vaults**

Autofill & save

Click on the **Autofill & save** tab, and then disable "**Offer to save and sign in with passkeys**" because we currently do not use passkeys.

Make sure the vault selected next to "**New items get saved in:**" is set to **your named vault** e.g. `John Doe`. It should not be set to "Employee" or "Private" or anything else.

1Password extension settings

Customize how the 1Password extension works in your browser. These settings are specific to this browser profile.

- General
- Security
- Autofill & save**
- Accounts & vaults
- Notifications
- Watchtower
- Appearance & shortcuts
- Integrations
- About

Autofill & save

- Offer to fill and save passwords
- Show autofill suggestions when a form field is in focus
- Offer to save items in autofill suggestions
- Offer to save and sign in with passkeys
- Allow caching passkey IDs in local storage
- Improve the autofill experience with smarter suggestions while safeguarding your private key data. This may reveal your ownership of passkeys in 1Password.
- Stop competing "sign-in with" pop-ups in the browser
- Sign in automatically after autofill
- 1Password will automatically submit forms after filling logins.

- New items get saved in: [Your Name]
- Offer to save logins
- 1Password will offer to save your pre-existing logins automatically.
- Offer to save credit cards
- 1Password will offer to save your pre-existing credit cards automatically.
- Offer to save contact information
- 1Password will offer to save your contact information automatically.
- Offer to save "sign-in with" logins

Accounts & vaults

Click on the Accounts & Vaults tab on the left. Uncheck Employee:

- General
- Security
- Autofill & save
- Accounts & vaults**

Accounts & vaults

Autofill and search from specific accounts or vaults while using this browser:

Account/Company Name
yourname@example.com

Employee

As of May 1, 2024 the name of the "Private" vault has been changed to "Employee" for 1Password business accounts. This change was not made by us but [by the developers](#) of 1Password. Please continue to leave the Employee vault empty.

Step 6: Proceed to Section 5

You're done!... at least with this part. Please proceed to **Section 5** to install 1Password on your phone or other mobile device. Note that **Section 4** is optional. If you have any questions, contact IT for help.

Revision #15
